PERSONAL PROFILE

I'm a Web Developer based in Toronto with a background in Molecular Genetics and Computer Science. I'm passionate about learning: I love researching, exploring new concepts, and sharing my findings with others. I value clarity and simplicity, and I bring that approach into my development by writing clean, intuitive code. When I'm not coding, you can find me tending to my collection of epiphytic plants, playing with cats, or watching spooky movies.

SKILLS

- HTML5, CSS3, SCSS
- JavaScript, jQuery, React
- Git, Github
- Relational Databases, SQL
- OOP (Java, C, Python)
- Software Testing
- Problem Solving
- Academic Research
- Academic Writing and Presentation
- Customer Service

EDUCATION

Web Development Immersive Certificate

Juno College of Technology | 2020

BSc Computer Science (incomplete)

University of Toronto | 2016 - 2018 | GPA 3.6/4

MSc Molecular Genetics

University of Toronto | 2013 - 2016

BSc Biochemistry

McGill University | 2009 - 2016 | GPA 3.5/4

PROJECTS

Sapling

React, Firebase, HTML5, CSS3 | September 2020

A simple, React-powered plant journal. Sapling allows users to create and persistently store information cards about their plants.

Atmosphere

jQuery, HTML5, CSS3 | September 2020

Atmosphere takes a user's location and generates a minimalistic workspace inspired by current weather. Atmosphere uses APIs from OpenCage, OpenWeatherMap, and Unsplash. A joint project with Joey Chau.

Lite-Brite

jQuery, HTML5, CSS3 | September 2020

An interactive, online reincarnation of the classic Hasbro game, Lite-Brite.

EMPLOYMENT HISTORY

Hunter Coffee Shop

Barista | 2018 - 2020

- provided riendly, expedient customer service in a popular neighbourhood shop
- boosted repeat sales by cultivating relationships with dozens of local residents
- effectively practiced active listening and deescalation with frustrated customers to preserve the shop's friendly brand
- designed, sourced, and maintained a feature wall of plants that became a focal point of the shop
